Organisations involved in the project

Department of Demography and Geodemography

Charles University in Prague, Faculty of Science

Project objectives

Situation

- Health care systems of many developed countries undergo principal restructuring and their key parameter settings are changing.
- Health care systems are globalised.
- Financial budgets are limited.

Questions

- What are indicators of quality in medicine in developed countries?
- Are they measurable?
- In what way?

Project objectives

Methodology: Mixed research strategy

- Qualitative analysis of quality control systems and transcribed interview with health care professionals and patients
- Questionnaire
- Quantitative analysis of questionnaire results

Project objectives

Research team consists of:

- Psychologist
- Philosopher
- Demographers
- Economist
- Lawyers
- Physician

First output of our research work

Konečná, H., Slouková, D., Mardešić, T. (2012). *Trust-Based Medicine. The unfortunate patient in the postmodern era*. Prague: Galén. ISBN: 9788072628780, 155 pages.

Contents

1. My ear hurts! 2000 BC: Here, eat this root.
2. 1000 BC: That root is for heathens. Say this prayer.
3. The vodka was good, but the meat was rotten.
4. 1700 AD: Prayers are superstition. Here, drink this concoction.
5. 1900 AD: That concoction is not scientifically based. Take this pill.
6. A conflict between body and soul.
7. 100 Bottles of Beer on the Wall.
8. I work scientifically on the basis of arithmetic and geometry.
9. 2000 AD: That pill isn't natural. Here, eat this root. ...?
10. I can recognize only those truths that present themselves to my soul so plainly and clearly that I cannot doubt them.
11. The blind oracle of Thebes.
12. How we hardened steel and how we harden ourselves and the reader.
