receiver)

Cognitive/critical
thinking skills
development

Cultural nuances
or some intangible
cultural words

Independence
of
technology

Learning a language
is not just about
communication; it's about
understanding each other's
culture, mindsets, perception of the
world, how you see it.
You would miss the sense of
achievement that comes from
learning a new language.
But if you don't understand
and will be dumb.

First
it's important to
know how to
be a good AI

AI doesn't have
the same culture
of the language

AI is lacking
emotion
it's just a machine
that can't think
and feel.

AI is just a
machine that
can't think
and feel.

1. Little depth of
conversation (superficial)
- can't have deep, meaningful
conversations
2. Lack of understanding
- not able to understand
context

YES
- AI is a tool, not a person
- it's not supposed to be
- it's just a machine that
can't think and feel.

Because
it's the best
gift we can
give ourselves!

Yes! AI is a
great tool for
learning a language.
It can help you
practice speaking
and listening.
It can also help you
understand the culture
and context of the language.

Yes, it is important
to learn languages
for the sake of better
communication.
It's not just about
the words, but the
meaning behind them.
It's about understanding
the world around you.

You also develop
cognitively
by learning
languages...
